Private Bag 1, Houghton 2041, Gauteng, South Africa

Tel: +27 11 484 5288

www.sada.co.za | www.sadacongress.co.za

A personal invitation from Mr KC Makhubele – SADA Chief Executive Officer

The Covid-19 pandemic had a huge impact on the dental industry, with access to dental services severely limited and patient and staff safety challenges. The journey has proven that dentistry is an essential service, and while the pandemic is not yet fully in the rearview mirror, many practices persevered – adopting the required infection control processes and procedures that needed to be in place to protect the dentists themselves, co-workers, and patients. Despite the numerous disadvantages caused by the pandemic, the oral health industry, as a whole, found ways to adapt and succeed. The 2022 SADA Dental & Oral Health Congress and Exhibition theme is “A Whole New World” and highlights a new context of dental care and public protection.

The South African Dental Association aligns all congress activities with the promotion and education of delegates with new ideas and techniques at all levels within the dental fraternity. The platform offers opportunities for all role players in oral healthcare in South Africa. Events are always a perfect opportunity for traders both dental and non-dental to ignite new relationships and rekindle old ones with clients, colleagues, and friends.

The SADA Scientific Advisory Committee (SADASAC), ensures an exceptional clinical programme with the top speakers both locally and internationally. The following experts in their respective fields have been invited to serve on the Scientific Advisory Committee, and have an excellent line-up awaiting your attendance:

Dr Mark Bowes - Scientific Convenor, Dr Howard Gluckman, Dr Nthabiseng P Metsing, Dr Vishal Bhika, Dr Yvette Solomons, and Dr Jean van Lierop

See you all at SADA 2022.
